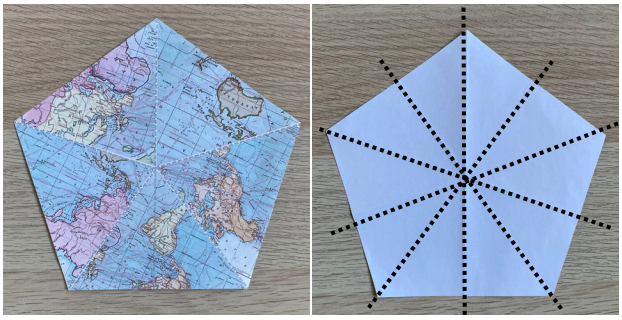
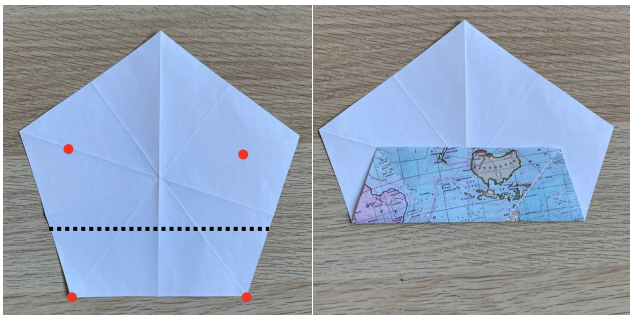
Be a star in the world!

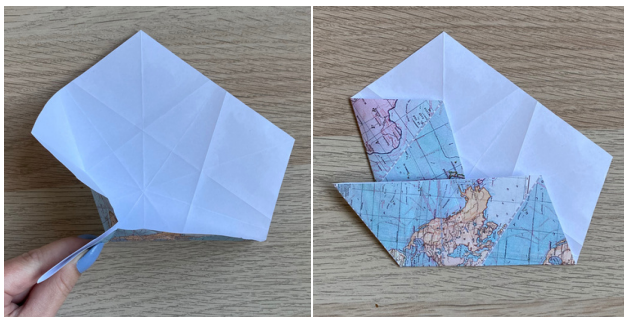
Step 1
Cut out the shape and fold it in half along all the dotted lines and crease (total of 5 folds).



Step 2
With one corner of the pentagon pointing away from you, fold the bottom flat side upward. Match the bottom two red dots of the pentagon with the two top ones. Crease. Open it back up and rotate to the next corner. Repeat the fold until you've done it 5 total times.

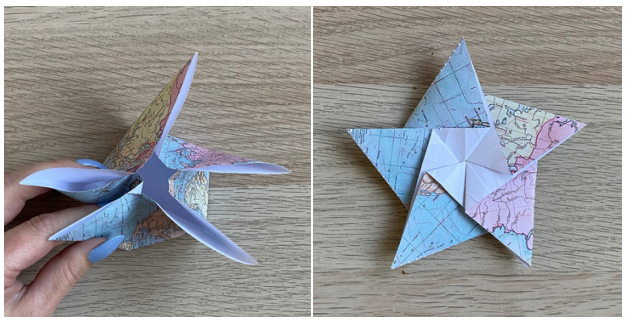


Step 3
With one corner of the pentagon pointing away from you, lift the lower left side of the pentagon along the crease from fold #2. Also lift the bottom of the pentagon along the crease from fold #2. This will cause some of the paper to stick up; fold it down to the left and crease. Open the pentagon back up and rotate it to the next corner, repeating the fold for a total of 5 times.



Step 4
Bring each of the straight edges of the pentagon toward the middle, allowing each of the corners to fold as the pentagon closes into a star shape with a small pentagon in the middle.

Step 5
Flip the star over to the other side. You will see points along the outside and a pentagon shape in the middle. Fold one corner of the pentagon into the middle, creasing the fold all the way out to the point to create a sharp star point. Rotate and repeat. When you get to the 5th fold, you will have to slightly open the 1st fold to complete it.



Step 6
Press down along each final fold. If you'd like to make your star an ornament, punch a small hole near the top of one point and thread twine through it, then tie in a loop.
